Your preparation is important to us

Choose functional clothing that efficiently transports moisture to the outside. Apply the layering principle so you can react optimally to temperature fluctuations. Don't pack too much; you'll be amazed at how little you really need. We recommend backpacks with a volume of approximately 30 liters.

Rental Equipment

* The emergency avalanche equipment consists of: backpack, avalanche transceiver, avalanche shovel, avalanche probe, and for glaciated terrain, we also provide high-altitude climbing equipment.

* * You can rent the ABS backpack cost-effectively from our alpine school.
